

food & consumer products

YOUR PARTNER IN VALUE-BASED PROJECT DELIVERY

IDC OFFERS A FULL RANGE OF PLANNING, ARCHITECTURAL, ENGINEERING, AND CONSTRUCTION SERVICES FOR FOOD AND CONSUMER PRODUCT MANUFACTURERS AND DISTRIBUTORS. WE PARTICULARLY FOCUS ON THE FOLLOWING MARKETS: PROCESSED FOODS, BEVERAGE AND DAIRY, AG/BIO AND TRANSGENICS, MEAT, FOOD INGREDIENTS AND DERIVATIVES, AND CONSUMER PRODUCTS.

BUT IDC IS MUCH MORE THAN A SERVICE PROVIDER. WE WORK AS PARTNERS WITH OUR CLIENTS, IDENTIFYING AND IMPLEMENTING THE CHANGES AND IMPROVEMENTS THAT CAN MAKE THEIR BUSINESSES MORE SUCCESSFUL.

innovative

DESIGN AND CONSTRUCTION SOLUTIONS FOR FOOD AND CONS

CLIENT-FOCUSED APPROACH

IDC's goal is to partner with clients, not only to deliver operating systems and facilities, but also to improve our client's bottom line. As a business partner, we sit on the same side of the table and openly share information for mutual benefit.

Our staff includes a wide variety of food and consumer product specialists, most of whom have worked on the client side. With this experience base, we can better understand each client's needs and adapt our project delivery approach to meet those needs.

We work equally well with small and large firms and on small and large projects. We can assemble a regional or functional team throughout the world. We can be an extension of a client's internal resources or a freestanding organization that works through a bid process as a designer, a construction manager or a design-builder.

Whatever the scope of a project, we build repeat business relationships through mutual trust, open communication, performance measured against predetermined metrics, and commitment to assemble the best possible team.

SERVICES

- Strategic Planning
- Site Selection
- Master Planning
